

Grow Profits & Stretch Budgets with Lecterns & Sound Systems

This is a great niche product that helps strengthen your position as more than a supplier of commodities, but of higher margin, value-added business solutions for your customers.

Every organization from schools to small businesses, even the corporate world can use some help stretching budgets. No matter what funds are available, every customer can use a sound system that looks and sounds great. AmpliVox products will do both. They can adapt to various presentation needs and expand when the organization grows.

Sales Feature: AmpliVox offers a complete line of wood lecterns like the S450 with built-in 50 watt wireless sound systems to portable 250 watt sound powerhouses that cover football fields and, of course, all the accessories that are going to drive up your profit.

One of the first items to recommend is the Ampli-Pod Portable PA Podium, SW124. This "all-around" tabletop PA system includes computer and projector

interface cables that will attach to a 2 watt computer and blast the sound up to 50 true watts! The ultra portable, lightweight and rugged SW124 will reach an audience of 1,500 with 180 degree coverage due to inventive speaker placement. The best part, its plug and play design makes it easy to use, yet the amplifier features make it technologically advanced.

Sales Feature: If your customers are on the go, one of the great benefits of having their own sound system is they are never surprised. They can focus on their work instead of putting out fires.

Larger businesses and schools might want a modern lectern for use in multi-purpose rooms. The Executive Adjustable Sound Column Lectern, S505A, is perfect because it adjusts easily from 39 in. to 45 in. and its on

four wheels for easy maneuverability. For still larger audiences, the Digital Audio Travel Partner, SW915, is the first digital 250 Watt PA with remote control in the industry. This first of its kind system delivers 250 Watts to audiences up to 7,500 covering rooms as big as 25,000 sq. ft. with all the features you expect and then some. Standard equipment built into the SW915 Digital Audio Travel Partner includes a UHF 8-channel diversity internal wireless receiver, a CD/RW MP3 disc player with pitch control and USB input, with choice of mic: handheld, headset, collar or lapel and transmitter. Additional features like ducking, (automatic reduction of music when the microphone is in use) make the unit easy to use for the presenter.

Traveling with your own public address system takes the on-site equipment

worry out of getting your message across, and the AmpliVox SW915 gives you the choice of using AC power or battery operation with up to 10 hours of runtime from two 12-volt rechargeable batteries that are accessible and user replaceable. Travel is easy, because the 35-pound system rolls effortlessly on heavy duty wheels. When you get there, the handle retracts, and you're ready to present.

Think of all the great uses for these products: Multimedia Presentations, Training Seminars, Board Rooms, Company Meetings, Conferences, Educational Settings, Talent Shows, and Trade Shows. These are great niche products that help strengthen your position as more than a supplier of commodities, but of higher margin, value-added business solutions for your customers.
