#### **INSTALLATION INSTRUCTIONS**

- **Adjustment:** The S1270 is constructed with a pivoting, cast iron base. Loosen the wing nut connecting the base to the horn and remove the base.

With a screwdriver, loosen the screw on the back of the speaker if you wish to rotate the horn between vertical and horizontal positions. Tighten the screw securely when the desired position is reached.

- **Base:** The base contains 3 holes for screws (not included). Use screws with greater than 1/4" diameter head to ensure safe installation. Screw the base to the mounting surface where you wish to install horn.

Reattach the horn to the base, rotate the horn to your desired angle and tighten the wing nut securely.

- **Wiring:** To aid weatherproofing, the wire connections are sealed internally, and accessible through a 20" lead.  
Connect the Brown (positive) and Black (negative/ground) wires to the corresponding 8 ohm outputs on your amplifier.
- If you wish to use the tamper loop functionality, connect the Red and Green wires to the appropriate circuit in your alarm system. If the circuit is broken, an alarm can be triggered. This is normally closed (NC) circuit
