Main Unit

1. Infrared sensor
2. Power Status LED.
3. Wireless (RF=Radio Frequency) Signal Indicator: This LED indicates when Wireless (RF) signal is received from transmitter.
4. Power: On/Off
5. Wireless receiver module power switch and volume control.
6. 1.8”/3.5mm audio input jack. (For USB/iPod/MP3/CD/DVD/Cassette and other similar devices. Adapters from nearly any audio source to 1/8”/3.5mm are available at Audio Stores)
7. 1/8”/3.5mm mixer output jack. (For Recording or for use with external speaker systems)
8. Line in R/L - RCA Connectors (standard connectors for home audio devices)

**CAUTION**

1. Turn microphone unit off when charging.
2. Insert microphone into unit vertically. Do not insert forcefully or damage may occur. The unit has not been correctly inserted if indicator does not light up.
3. Do not use any other type battery than the supplied nickel hydrogen type. Other batteries may be used to replace, but they must be nickel hydrogen batteries or damage and poor charging ability may occur. We are not responsible for damage resulting from any other batteries being used including fire, injury or any other liability.
4. When microphone battery indicator shows the charge is empty (shows red) please charge as soon as possible to extend the life of the battery. When microphone battery voltage is low, the result is often that the sound cuts in and out, distortion is present or wireless signal is weak.
5. Do not submerge, or sprinkle with water or other liquids. Do not attach battery leads with conductive materials. Damage will likely occur.
