

**#4** Locate post mounting opening on bottom of amplifier and set onto amplifier mount post.

**#3** Slide amplifier mount to desired height and tighten to speaker post.

**#2** Take amplifier mount and slide onto the speaker post with the holes.

Take post and slide into tripod.  
Tighten tripod clamp to secure post into tripod.

**#1** Stand tripod up and open.

**#5** Take one horn assembly and push mounting stud through top hole in post and tighten with knob.

Repeat with other three horns.

For maximum performance, mount horns vertically as close to each other as possible.

**#6** Take one of the two speaker cables and connect to the top two horns. Plug cable into Speaker (L) of amplifier. Repeat with other cable and plug cable into Speaker (R) of amplifier.

Speaker / Amplifier assembly is complete.

*Follow separate amplifier instructions for using the amplifier.*

**Model S1921** Optional Storage Carry Case – Heavy duty padded nylon with two hand straps. Enough room to store horns mounted to post for quick set-up.
