Rack Cabinets

Store your rack components in elegance and style!

The AmpliVox series of 19-inch rack cabinets are designed and engineered with safety, security and elegance in mind. Now your AmpliVox rack equipment will compliment your refined décor, in any room.

The standard rack rails allow up to 12U (RC1201) or 21U (RC2101) components (17 inches deep) to be stacked within the unit. Power is provided by a built-in 6-outlet strip with surge suppressor, while your A/V gear is cooled by a UL-listed fan which draws air in from bottom vents. Four 3” swiveling casters (front locking) provide mobility. Both the front wood frame door with black tinted acrylic panel and solid wood rear access door has a key lock for security.

These cabinets are built to furniture quality standards and finished in either wood veneer or durable laminate with choice of colors.

- Includes 2 pairs of 10-32 threaded, universal EIA spacing, fixed front and user installed back steel rack rails
- UL-listed cooling fan provides air circulation with dual bottom vents for flow through ventilation
- Standard with a 6-outlet power strip with surge suppressor, 10 foot power cord with rotating 360° flat wall plug, excess cord wrap hooks and cord management access points on both the top and bottom of the unit
- Four sturdy bolt-through 3 inch swivel casters. The 2 front casters are locking
- Locking front door with black tinted acrylic panel and solid wood rear locking door for security
- Ships fully assembled
- Made in USA
- Dimensions: 12U Cabinet Model RC1201 (WxDxH) 22 x 25 x 28 1/2”; 21U Cabinet Model RC2101 (WxDxH) 22 x 25 x 42 3/4”
